SHAMIRUDEEN R

B.Tech Artificial Intelligence & Machine Learning Student | AI/ML Enthusiast

Trichy, Tamil Nadu | shameer100s7@gmail.com | GitHub | Portfolio

PROFILE

Third-year B.Tech Artificial Intelligence & Machine Learning student at Dhanalakshmi Srinivasan University, Trichy, with hands-on experience in Python, machine learning, deep learning, computer vision, and data science. Interested in building practical AI systems that solve real-world problems, with project experience spanning predictive maintenance, object detection, and climate-risk early warning systems.

EDUCATION

Dhanalakshmi Srinivasan University, Trichy **CGPA: 7.5/10**

B.Tech – Artificial Intelligence & Machine Learning | 3rd Year

TECHNICAL SKILLS

Programming	Python, HTML, CSS, JavaScript, SQL
AI / ML	Machine Learning, Deep Learning, Computer Vision, Data Science
Frameworks & Libraries	Scikit-learn, TensorFlow, PyTorch, OpenCV, NumPy, Pandas, Jupyter
Development	Git, GitHub, VS Code, React, Node.js, Firebase, MongoDB
Design / Other	UI/UX, Figma, Canva, Bootstrap, Spline

SELECTED PROJECTS

Climate-Resilient City — AI-Powered Early Warning System

Tech: Python, XGBoost, OpenCV, U-Net, FastAPI, IoT, GIS, APIs

Built an end-to-end concept for hyperlocal flood, heat, and water-shortage risk detection. Integrated live weather, elevation and IMD warning data with ML/CV models, IoT ingestion, GIS risk analysis, and automated SMS/voice alerts.

Vehicle Maintenance Prediction Model

Tech: Python, Scikit-learn, Random Forest, XGBoost, Pandas

Developed a predictive-maintenance workflow using logistics/vehicle data, including preprocessing, model training, evaluation, and serialized model deployment components.

YOLO Object Detection

Tech: Python, YOLO, Computer Vision

Implemented an object-detection project to identify objects such as people and other classes from visual input, demonstrating practical computer-vision workflow experience.

Hyperlocal Flood Risk Prediction

Tech: Python, Machine Learning, Hydrology, GIS

Worked on a hyperlocal urban flood-risk prediction system combining hydrological features and machine-learning ensembles to estimate flood probability, inundation depth, and time-to-peak.

STRENGTHS

Problem Solving • Quick Learning • Teamwork • Communication • Leadership • Practical AI/ML Development

CAREER OBJECTIVE

Seeking an AI/ML internship where I can apply my Python and machine-learning skills, contribute to real-world projects, and strengthen my experience in production-oriented AI development.
